# Special ALERTS

## ONIONS

Red onion supplies will be limited for the next two weeks. Yellow and white onions remain in good supply with declining pricing.

## RASPBERRIES

Volume is decreasing due to heat, and limited supply is expected for the next few weeks until a minor peak in May. Quality remains good.

## AVOCADO

Mexican supply estimates are lower than expected, resulting in smaller available sizes and premium pricing for larger sizes throughout the summer. California avocados are plentiful, especially in 48/60cts sizes, with excellent taste and quality.

## SUGAR & SNAP PEAS

The market is firm on snow and snap peas, with volumes down in both East and West due to transitioning regions. Snow peas supplies are expected to be light for the next week.

## CHILI PEPPERS

Eastern supply is limited, with strong demand and lower pricing for specific varieties. Western volume is limited across all varieties, particularly Serrano, with no relief expected for 2-3 weeks.

## PEARS

Supplies remain tight market-wide, especially with smaller sizes in minimal quantities.

## LIMES

The market continues to strengthen on large sizes due to increased crossings of small sizes. The scarcity of large fruit may extend, with pricing likely to climb. Flexibility is necessary to fulfill orders.
